INSIDE THIS ISSUE

Join Our Free Cybersecurity Synchronous Courses Across Europe!

In an era where cyber threats grow more sophisticated and digital infrastructure forms the backbone of both public services and private businesses, building cybersecurity capacity is not a luxury; it's a necessity.

That's why the **CyberPro Train** project is proud to announce the launch of its synchronous cybersecurity training courses, tailored for professionals working in public administrations, SMEs, and critical infrastructure sectors. These real-time, expert-led sessions are part of a larger European effort to address the cybersecurity skills shortage and align with key EU legislation such as the NIS2 Directive and the Cyber Resilience Act.

What's in the Calendar?

The synchronous training calendar is now live! You can explore dates, topics, and registration details directly through our official website: https://cyberprotrain.eu/?page_id=658

The courses will be delivered across Italy, Spain, and Greece, with options available in each local language, as well as in English to ensure broader accessibility. These interactive sessions allow participants to engage directly with trainers, ask questions, and apply concepts in real-time.
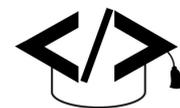

Topics Covered

The training program covers a broad range of high-impact cybersecurity topics, including:

- **Fundamentals of IT Security**
- **Fundamentals of Operating Systems and Databases**
- **Networking aspects and TCP/IP protocols**
- **Introduction to Regulations and Best Practices**
- **Fundamentals of Computer Security – Advanced**
- **Advanced Management of Operating Systems and DBs**
- **Advanced Architectural Security**
- **Advanced Network Security**
- **Advanced Cloud Security**
- **Artificial Intelligence in Cybersecurity**

Meet the Partners Behind the Training

The quality and relevance of the courses are guaranteed by the involvement of three leading organisations in the cybersecurity and innovation space:

- TIM (Telecom Italia): A major telecom player and innovation leader, providing technical expertise and cutting-edge resources in cybersecurity.
- S2GRUPO (Spain): A renowned cybersecurity company specialising in the protection of critical infrastructure and real-time threat analysis.
- Innovation Hive (Greece): An organisation committed to inclusive learning, responsible for designing practical and accessible training experiences for learners from all backgrounds.

Why Should You Join?

Whether you're an IT manager in a municipality, a cybersecurity officer in a small or medium-sized business, or someone just starting your journey in the field, these courses are designed to give you the practical knowledge and confidence to secure your digital systems and stay ahead of emerging threats.

Participation is completely free of charge and the schedule is built to accommodate working professionals. Each session is interactive, offering real-time engagement with industry experts and providing insights aligned with the latest EU standards. Upon completion, participants will receive a certificate of participation, validating their skills and commitment to cybersecurity excellence.

Spaces are limited, and interest is already growing across Europe. Don't miss the opportunity to join this dynamic training initiative.
